

ADDENDUM NO. 1 TO ALL BIDDERS:

Reference: Invitation for Bids, IFB# 13772JM, Round 1 Questions and Answers

Commodity: Flutter Flag Kits and Flags

Dated: August 31, 2026

All offerors are required to acknowledge all addenda in their proposals.

Regarding the requirement for "no tool required" flag installation. Due to varying soil conditions, driving the ground stake for a +10ft flutter flag typically requires a hammer or mallet for secure placement. Could you please confirm if using a driving tool for the stake is acceptable?

A. Yes, the use of a driving tool, such as a hammer or mallet, is permissible during installation if needed based on site-specific ground conditions. A driving tool is not required for installation, and the Bidder is not required to provide a driving tool.

Sincerely,

Jennifer Mabie
